When I Fell From the Sky Springer Science & Business Media
Industrial development of software systems needs to be guided by recognized engineering principles. Commercial-off-the-shelf (COTS) components enable the systematic and cost-effective reuse of prefabricated tested parts, a characteristic approach of mature engineering disciplines. This reuse necessitates a thorough test of these components to make sure that each works as specified in a real context. Beydeda and Gruhn invited leading researchers in the area of component testing to contribute to this monograph, which covers all related aspects from testing components in a context-independent manner through testing components in the context of a specific system to testing complete systems built from different components. The authors take the viewpoints of both component developers and component users, and their contributions encompass functional requirements such as correctness and functionality compliance as well as non-functional requirements like performance and robustness. Overall this monograph offers researchers, graduate students and advanced professionals a unique and comprehensive overview of the state of the art in testing COTS components and COTS-based systems.

The author explores Martin Heidegger's intimate connections with Christianity by examining the close ties he and his family had to the Catholic Church and from within his fundamental ontology. He demonstrates through literary and comparative analysis the

affinity that exists between a philosophy of facticity and Christian theology.

This book contains contributions presented during the international conference on Model-Based Reasoning (MBR'012), held on June 21-23 in Sestri Levante, Italy. Interdisciplinary researchers discuss in this volume how scientific cognition and other kinds of cognition make use of models, abduction, and explanatory reasoning in order to produce important or creative changes in theories and concepts. Some of the contributions analyzed the problem of model-based reasoning in technology and stressed the issues of scientific and technological innovation. The book is divided in three main parts: models, mental models, representations; abduction, problem solving and practical reasoning; historical, epistemological and technological issues. The volume is based on the papers that were presented at the international

If the best things come in small packages, then these 40 tiny hotels from around the world are sure to provide an exceptional experience. These days getting away from it all also means escaping the mundane atmosphere of big resorts and cookie-cutter experiences. Whether you are searching for a truly unique getaway in a beautiful corner of the world or looking for inspiration when designing your own home, this book is bursting with stunning ideas and locales. The 40 hotels profiled have only a few rooms and you won't find them in traditional travel guides. The breathtaking photography captures the hotel's character, its architectural features, and the surrounding landscape. There are wilderness retreats such as Pumhouse Point in the middle of a Tasmanian lake and Mediterranean escapes such as Tainaron Blue, a stone tower in the Peloponnesian Islands. There are hidden gems in busy cities--Ottantotto Firenze in Florence, the

Trunk House in Tokyo, and Los Angeles's Hotel Covell; edge-of-the-world experiences like Deplar Farm in Iceland and Sheldon Chalet in Alaska; and peaceful desert solitude at Amangiri in Utah and Namibia's Shipwreck Lodge. This volume also features architectural splendors such as the cedar and adobe huts of Punta Caliza in Isla Holbox, Mexico, and Free Spirit Spheres, a group of circular treehouses in a forest on Vancouver Island. A valuable resource for the discriminating traveler, as well as a source book for designers and architects, this collection of one-of-a-kind hotels offers relief to anyone overwhelmed by our busy and crowded world.

Ancient Babylonian inscription X Preface Preface to the English Edition The book you are reading is a translation from Russian into English. Within a pretty short term this book saw two editions in Russian. The authors received in spiring responses from readers that both stimulated our continuing and improving this work and made sure it would not be in vain of us to try to multiply our readers by covering the English-speaking engineering community. When we prepared the present edition, we took into account interests of the Western readers, so we had to make some changes to our text published earlier. These changes include the following aspects. First, we excluded a lot of references and discussions regarding Russian engineering codes. It seems to us those are of no real interest for Western engineers oriented at Eurocode or national construction design regulations.

This book argues that we can explain higher education change by shifts in one or more conditionings of structure, agency and culture. It proposes two models to clarify the link between these conditionings. It explores Giddens' structuration theory and Archer's critical realism. It supports duality and reflexivity, denying analytical dualism.

As humans re-negotiate their boundaries with the nonhuman world of animals, inanimate entities and technological artefacts, new identities are formed and a new epistemological and ethical approach to reality is needed. Through twelve thought-provoking, scholarly essays, this volume analyzes works by a range of modern and contemporary Italian authors, from Giacomo Leopardi to Elena Ferrante, who have captured the shift from anthropocentrism and postmodernism to posthumanism. Indeed, this is the first academic volume investigating narrative configurations of posthuman identity in Italian literature and film. *Karl Barth and Christian Ethics* LIT Verlag Münster

This Palgrave Pivot questions how a new generation of alternative stand-up comedians and the political world continue to shape and influence each other. The Alternative Comedy Movement of the late 1970s and 1980s can be described as a time of unruly experimentation and left-wing radicalism. This book examines how alternative comedians continue to celebrate these characteristics in the twenty-first century, while also moving into a distinct phase of artistic development as the political context of the 1970s and 1980s loses its immediacy. Sophie Quirk draws on original interviews with comedians including Tom Allen, Josie Long, John-Luke Roberts and Tony Law to chart how alternative comedians are shaped by, and in turn respond to, contemporary political challenges from neoliberalism to Brexit, class controversy to commercialism. She argues that many of our assumptions

about comedy's politics must be challenged and updated. This book is essential reading for anyone who wants to understand the working methods and values of today's alternative comedians.

For three years in a row, an international group of philosophers of education came together to reflect and promote a conception of philosophy as a lived experience. This book is a result of their discussions and makes an original contribution to the field. The book presents conceptual and critical works relevant to the current theoretical developments and debates within the fields of philosophy and education. The articles contribute both to philosophical clarifications and the advancement of research with solid arguments for theoretical and practical redirections. To deploy their arguments, the contributors draw on classical thinkers - such as Plato, Kant, and Dewey - and on contemporary prominent theorists - such as Derrida, Badiou, and Deleuze - with fresh and critical perspectives. The term education itself means 'to train', 'to lead out' and to 'bring up'. It is said that education is a life-long process, but the basic education that one undergoes during the formative years definitely contributes to the shaping of one's future and outlook. At this point, the school and high school education assumes importance. Even though the history of education in Nepal is relatively short, there has been a considerable growth in the number of educational institutes after the restoration of democracy in 1950 and particularly after 1990 AD. However, having no standard measuring rod to use when evaluating the institutes of higher education, students and parents have had trouble when selecting a college. Furthermore, beguiling advertisements make it impossible to decide which college is

genuinely worth attending. Nowadays, it cannot be denied that numerous mediocre institutes exist which try to make a quick buck and cheat the students. This may not always be the case, but such incidents cannot be overlooked. Hence, this subject and possible solutions are analysed in this comprehensive study. *Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen* Penguin Home to the vibrant city of Honolulu, Hawai'i's third largest island also offers natural beauty in abundance.
