The elements of algebra were known to the ancient Mesopotamians at least 4000 years ago. Today algebra stands as one of the cornerstones of modern mathematics. How then did the subject evolve? How did its constituent ideas and concepts arise, and how have they changed over the years? These are the questions that the authors address in this work. The authors challenge the existing view that the development of algebra was driven by the investigation of determinate equations and in particular their solution by radicals. In short they claim that the study of indeterminate equations was no less important.

Historians of mathematics, as well as working algebraists who want to look into the history of their subject, will find this an illuminating read.

Perico, or parrot, was what Dad called me sometimes. It was from a Mexican saying about a parrot that complains how hot it is in the shade, while all along he's sitting inside an oven and doesn't know it.... For Manuel Hernandez, the year leading up to his test of courage, his initiation into a gang, is a time filled with the pain and tension, awkwardness and excitement of growing up in a crazy world. His dad spends most of his time and money at the local pool hall; his brother flips through jobs like a thumb through

a deck of cards; and his mom never stops cleaning the house, as though one day the rooms will be so spotless they'll disappear into a sparkle, and she'll be free. Manny's dad is always saying that people are like money--there are million- and thousand- and hundred-dollar people out there, and to him, Manny is just a penny. But Manny wants to be more than a penny, smarter than the parrot in the oven. He wants to find out what it means to be a vato firme, a guy to respect. In this beautifully written novel, Victor Martinez gives readers a vivid portrait of one Mexican-American boy's life. Manny's story is like a full-color home movie--sometimes funny, sometimes sad, but always intensely original. For Manuel Hernandez, the year leading up to his test of courage, his initiation into a gang, is a time filled with the pain and tension, awkwardness and excitement of growing up in a mixed-up, crazy world. Manny's dad is always calling him el perico, or parrot. It's from a Mexican saying about a parrot that complains how hot it is in the shade while all along he's sitting inside the oven and doesn't know it. But Manny wants to be smarter than the parrot in the oven—he wants to find out what it means to be a vato firme, a guy to respect. From an exciting new voice in Chicano literature, this is a beautifully written, vivid portrait of one Mexican-American boy's life. 1998 Pura Belpre Author Award 1996 Americas Award for Children's and Young Adult Literature 1997 Books for the Teen Age (NY Public Library) 1996 National Book Award for Young People's Literature Algebra 1 Turtleback Books
