## FITZPATRICK BRAIDEN

*Skilling India* Policy Press

This book on "Vocational Rehabilitation of Disabled in India, Principles & Practice" is an attempt to educate the present and future rehabilitation professionals in the area of vocational rehabilitation.

**Diversity within Diversity Management** PHI Learning Pvt. Ltd.

This book focuses on informal workers and margins and seeks to advance the discourse on the concepts of 'work', 'workers' and 'margins'. By largely focusing on informal, non-formal and non-industrial sector workers where unionism, collective bargaining, and labour laws have little influence, the book promotes approaches to understanding alternate worker politics and organising practices. As such, it presents an alternative to conventional approaches to understanding workers in management and organisation studies. The book draws attention to the mechanisms of erasure implicit in disciplinary and governmental practices that allow the worker to remain invisible. By making the worker visible, it seeks to go beyond economic and psychological approaches to work(ing) to understand the worker as a human being, with all the complexity, vulnerability and agency that status implies. Further, it seeks to go beyond worker victimhood to gather narratives of workers' worlds and the possibility of alternate worlds. The contributing authors bring together diverse perspectives from fields including industrial relations, environment, displacement, collective action, livelihoods, rural development, MSMEs, organisational behaviour and entrepreneurship to present a textured and multidimensional view of workers and their worlds.

**Teachers and Trainers in Adult and Lifelong Learning** MJP Publisher

It is clear that although the human resource management field has been drastically affected by global competition over the last twenty years, most of the research and publications in the field are geared to providing corporations with an understanding of their business environment. This book takes an entirely different approach by looking at the job and career markets from the point of view of individuals who are searching for new strategies to develop their careers in a global environment. This book offers readers the tools they need to evaluate and manage their career environment and personal career profiles, and ultimately, to have a rewarding global career.

*Global Marketplace for Private Health Insurance* Niruta Publications

This book discusses emerging issues related to teaching-learning in Indian higher education and the integration of technology. It brings together a host of national and international experts specializing in various aspects of teaching-learning in higher education, technology, and classroom practices to present policy and organizational strategies for enhancing innovation in teaching-learning processes, and offers a comprehensive overview of teaching-learning in connection with broader themes and concerns such as academic freedom, globalization, and new

technologies. Reviewing a wide range of current practices and discussing specific teaching-learning challenges in depth, the book will be of interest to researchers and students of education, practitioners of higher education policy, and teacher educators alike.

*India Higher Education Report 2016* Springer

The aim of this book is to consider theoretically the notion of the global competitiveness of regions, as well as giving attention as to how such competitiveness may be empirically measured. With this in mind, the book has three specific objectives: first, to place the concept of regional competitiveness within the context of regional economic development theory; second, to present a rationale and method for quantifying the global competitiveness of regions; and, third, to undertake the most geographically widespread analysis of regional competitiveness differences across the globe. With regard to the third goal, the analysis incorporates more than 500 regions across Europe, North and South America, Asia-Pacific, the Middle East, and the so-called BRIC economies of Brazil, Russia, India, and China. The importance of the concept of competitiveness has increased rapidly in recent years, with the issues surrounding it becoming, at the same time, more empirically refined and theoretically complex. The focus on regions reflects the growing consensus that they are the primary spatial units that compete to attract investment, and it is at the regional level that knowledge is circulated and transferred, resulting in agglomerations, or clusters, of industrial and service sector enterprises. This growing acknowledgement of the region's role as a key spatial unit of organisation has led to attention turning to competitiveness at a more regional level. The book explores the results of the World Competitiveness Index of Regions (WCIR), covering the rankings and results of the 2014 edition. The WCIR provides a tool for analysing the development of a range of regional economies across the globe. It enables an illustration of the changing patterns of regional competitiveness on the international stage to be generated. In fundamental terms, the WCIR aims to produce an integrated and overall benchmark of the knowledge capacity, capability, and sustainability of each region, and the extent to which this knowledge is translated into economic value and transferred into the wealth of the citizens of each region.

**INDIA Handbook 2018 for Competitive Exams - Schemes, Yojanas, Policies, Bill & Acts, Amendments, Judgements, Summits, Organisations, Tribunals, Committees** Asian Development Bank

The services sector has emerged as the most dynamic and important sector in India in the post-liberalization era. It has increased its contribution to the Indian economy not only in terms of GDP, but also in exports. However, one area where the services sector has not yet contributed significantly is employment creation. This has raised questions regarding the inclusivity of India's services sector-led growth story. This book is a collection of papers devoted to understanding and analysing the role of the services sector in GDP, trade and inclusive growth in the Indian economy. These contributions examine specific issues related to the services sector in India, such as employment, trade cycles, foreign direct investment, and

migration, and also analyse sector specific issues in selected services like retail, insurance, IT-BPO and aviation.

**Teaching Learning and New Technologies in Higher Education** Bloomsbury Publishing

The book focuses on the status of vocational education programs, challenges of achieving quality and attaining competitive excellence in a globalized socioeconomic order, and the role of government and industry in achieving these avowed goals. India's transition to a knowledge-based economy requires a new generation of educated and skilled people. Its competitive edge will be determined by its people's ability to create, share, and use knowledge effectively. A knowledge economy requires India to develop workers—knowledge workers and knowledge technologists—who are flexible and analytical and can be the driving force for innovation and growth. Developing skilled workers enhances the efficiency and flexibility of the labor market; skills bottlenecks are reduced, skilled workers are more easily absorbed into the economy, and their job mobility is improved. In this light, an effort is made in this book to describe and analyze governmental skill development initiatives in India. The book also dwells on the need to revive traditional family centric vocations pursued in the rural communities, especially those dying village-based vocations that provide livelihood options to a multitude of socially disadvantaged artisans, and integrate them into the fabric of skill development initiatives in place. The book provides a systematic understanding of the processes of skill formation and provides several pathways for enhancing entrepreneurial skills in a business ecosystem with a huge knowledge capital gained through skill development initiatives. Toward this end, the book seeks to contribute toward understanding the structures and processes of governance and initiatives for enhancing the quality of skilling programs. The book also dwells on various opportunities and challenges of augmenting a multitude of skilled workforces made available through various skilling initiatives and programs.

*Working in the Global Economy* SAGE Publications India

This text considers different economic models available in the global market. The US or Anglo-Saxon model is often portrayed as the best but now Asia is again on a roll. The book analyzes how these models have influenced both regional and global development, and engages in discussions upon alternatives and the search for the 'grail'.

Research Anthology on Vocational Education and Preparing Future Workers Publications Division Ministry of Information & Broadcasting

An exciting account of how government statistics in developing countries are social artefacts dynamically shaped by political and economic contexts.

**Decent Work: Concept, Theory and Measurement** Springer  
Generation of decent livelihood opportunities ought to be among the most important objectives on any meaningful agenda of economic development. On this front, however, the Indian experience has remained seriously inadequate. During the first four decades after Independence, India's achievements with respect to the problems of poverty, unemployment and occupational structural transformation were modest at best. Since the early 1990s, during the era of neo-liberal reforms, while economic growth has remained upbeat, the wellbeing of the masses has shown even greater stress. An indispensable entry point to the subject of labour in India, this Short Introduction locates the debate within the trajectory of economic development since India's independence.

**ADOLESCENCE EDUCATION** Springer

This book explores how the Indian education and training system prepares young people for the world of work and for the

requirements of the employment market – because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course-specific perspective, offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research.

Annual Report Springer

Financial protection against the cost of illness and inclusion of vulnerable groups will require better mobilization and use of private means. Private voluntary health insurance already plays an important role in mobilizing additional resources to the health sector and protecting against the catastrophic cost of illness in some countries. This review explores the context under which private voluntary health insurance could contribute to an improvement in the sustainability of the health sector and financial protection in other countries.

*Vocational Rehabilitation of Disabled in India* JagranJosh

'Decent Work' is a concept developed by the International Labour Organisation that sums up the aspirations of people in work life. This book provides a consolidated and encompassing guide to the underlying philosophy, meaning and theory of the decent work paradigm. It also provides an empirical analysis of the current status of decent work in the Information Technology (IT) industry of India adopting a pragmatic approach towards the measurement of decent work. One of the purposes of this study is to unfold different dimensions of decent work and counter the general perceptions about work conditions in the IT industry. Surprisingly, work was not found to be decent for a majority of Indian IT employees on various indicators. The key features of this book are: a thorough conceptual coverage; rich literature review; cross-examination of decent work indicators in the context of India's IT industry; construction of Decent Work Index (DWI) at the micro-level; indices for each decent work indicator; primary data based on questionnaire responses; and detailed discussion on the implications of deficiency of decent work in India in general and the IT industry in particular.

Development Models, Globalization and Economies Lulu Press, Inc

Taking its cue from theoretical and ideological calls to challenge globalisation as a dynamic of homogenisation – and resistance – as led from, and directed against, the Global North, this volume asks: what can we see when we shift the lens beyond a North-South binary? Based on empirical studies of 'frontier-zones' of legal globalisation in India, Pakistan and Latin America, the book adopts an original format. Framed as a relational dialogue between newer as well as more prominent scholars within the field, from various cores through to postcolonial academic peripheries, it questions structural variables in the shadows of legal globalisation and how we as scholars build a space for critique.

*Getting India Back on Track* Oxford University Press

Muthuveeran Ramasamy shows that the formal way of vocational education and training (VET) in rural areas often ignores the illiterate, the less educated, and the poor. The author demonstrates that VET programs need to be demand-driven and consider the socio-economic aspects of particular regions. Therefore, the significance of the study at grassroots level helps customize VET programs to respond to the demand of the

individuals' vocational training needs of rural people by keeping their endogenous needs at the centre of vocational skill development processes. The findings and lessons learnt from action research are also intensively discussed as guiding principles of demand-driven approaches from the learners'/societal perspectives.

**Demand-Driven Approaches in Vocational Education and Training** Cambridge Scholars Publishing

The primary intention of this publication is to assess and describe the need for introducing vocational education with a little more seriousness than ever before and to suggest ideas for establishing a vocational university with a difference. The idea is also to summarize the present technical and vocational education scenario and its problems. I also intend to hint upon some recommendation for policies to be implemented at state level and suggest possible measures to make vocational courses more relevant to the need of the time. A comparative study has been attempted between regular vocational programs and social fairness and job reliability and its effect in building up the career of the present-generation youngsters. I've also tried to focus on the initiatives, challenges, and the process of implementation of various projects and schemes undertaken by the government at different times in a bid to enhance employability. The objective is to explore into the output and its impact on the workforce plus the growth and development of the country. This book should form an interesting reading for those who are curious about an individuals potential strength and are engrossed in innovative projects particularly teachers, researchers, and administrators.

*Management Practices in Asia* SAGE Publishing India

The rapid economic growth experienced by India in the past few decades has radically transformed the nation's labor market, bringing millions of former agricultural workers into manufacturing industries, and, more recently, the expanding service industries, such as call centers and IT shops. Alongside this employment shift has come a change in health and health problems, as communicable diseases have become less common, while non-communicable diseases, like cardiovascular problems, have increased. This book connects those two trends to offer an analysis of effects of the work environment on the health of Indian workers that is unprecedented in scope and depth.

Enhancing Employability in Education Random House India

As the economic growth and social development of a nation is reliant on its workforce, it is essential to increase the workforce's employability through technical and vocational education.

Through these programs, the nation's workers will be able to acquire skills and flexibility in order to navigate across sectors of the economy and industry. However, due to gender disparities and socioeconomic statuses within society, women from a lower economic background are unable to gain access to these programs, hindering their career development and economic independence. *Gender Issues in Technical and Vocational Education Programs* is an essential critical resource that probes the issue of gender equity in specialized educational programs, such as vocational or technical education programs. It also presents global initiatives that are being undertaken to enhance the access to technical and vocational education programs to all citizens. Divided into two sections, this publication provides comprehensive coverage on understanding human resource skilling through vocational and training programs and promoting gender equity through skill development, making it an ideal resource for academicians, researchers, social scientists, educators, policymakers, government officials, and professionals. Engaging Employers in Apprenticeship Opportunities Making It Happen Locally Springer Nature

*A Deep Dive into NoSQL Databases: The Use Cases and Applications, Volume 109*, the latest release in the *Advances in Computers* series first published in 1960, presents detailed coverage of innovations in computer hardware, software, theory, design and applications. In addition, it provides contributors with a medium in which they can explore their subjects in greater depth and breadth. This update includes sections on NoSQL and NewSQL databases for big data analytics and distributed computing, NewSQL databases and scalable in-memory analytics, NoSQL web crawler application, NoSQL Security, a Comparative Study of different In-Memory (No/New)SQL Databases, NoSQL Hands On-4 NoSQLs, the Hadoop Ecosystem, and more. Provides a very comprehensive, yet compact, book on the popular domain of NoSQL databases for IT professionals, practitioners and professors Articulates and accentuates big data analytics and how it gets simplified and streamlined by NoSQL database systems Sets a stimulating foundation with all the relevant details for NoSQL database researchers, developers and administrators
