Ladybird Tales: Classic Stories to Share

Pearson South Africa
Destructive forces have been eroding the University of Cape Town, Africa's leading university. This book tells the sad, true tale of what has been transpiring. It is a saga of lunacy, criminality, pandering, and identity politics. The mad and the bad - the deranged, deluded, the depraved - have been granted endless latitude in bullying and abusing others. The decline began in 2015 with the Rhodes Must Fall protest that resulted in the offending statue's removal within a month, and which spawned similar protests abroad. Emboldened by

their local success, the protestors issued new and ever-increasing demands later that year and then again in 2016 and 2017. Their methods also became criminal - including intimidation, assault, and arson. The university leadership capitulated to this behaviour, and this fostered a broader and now pervasive toxic environment within the institution. These developments offer important lessons for universities around the world that are yielding to the forces of a faux "progressivism".

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a

solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Carson-Dellosa Publishing Thomas is moving to a new house, and he hates the idea with a passion. Even though his stepmother, Louisa, is quite cool, having a new half-brother or -sister is something Thomas is definitely not looking forward to. To make matters worse, the house

they are going to live in is an ancient Victorian place.

Report of the Director of Education Pearson South Africa

A child wanders too far into the Knysna Forest ... he never returns. Nine years later government officials working on a census find a white child living with a Coloured family in the mountains beyond the forest. They take him away from the stricken Fielia, who has brought him up as her son, and give him back to his 'original' family. Stunned and helpless, Benjamin waits for Fielia to reclaim him. But, powerless against authority, Fielia never comes. Benjamin has to grow up before he can go in search of the truth ...
