DENNIS RODNEY

The Learning Revolution Routledge

"This book offers a short, spirited defense of rhetoric and the liberal arts as catalysts for precision, invention, and empathy in today's world. The author, a professor of Shakespeare studies at a liberal arts college and a parent of school-age children, argues that high-stakes testing and a culture of assessment have altered how and what students are taught, as courses across the arts, humanities, and sciences increasingly are set aside to make room for joyless, mechanical reading and math instruction. Students have been robbed of a complete education, their imaginations stunted by this myopic focus on bare literacy and numeracy. Education is about thinking, Newstok argues, rather than the mastery of a set of rigidly defined skills, and the seemingly rigid pedagogy of the English Renaissance produced some of the most compelling and influential examples of liberated thinking. Each of the fourteen chapters explores an essential element of Shakespeare's world and work, aligns it with the ideas of other thinkers and writers in modern times, and suggests opportunities for further reading. Chapters on craft, technology, attention, freedom, and related topics combine past and present ideas about education to build a case for the value of the past, the pleasure of thinking, and the limitations of modern educational practices and prejudices"--

The Learning Revolution Penguin

Poetry of Opposition and Revolution is an important new study of the relation between poetry and politics in English literature from Dryden to Wordsworth. Building on his argument in *Poetry and the Realm of Politics: Shakespeare to Dryden* (also available from OUP), Howard Erskine-Hill reveals that the major tradition of political allusion is not, as has often been argued, that of the political allegory and overtly political poems, but rather a more shifting and less systematic practice, often involving equivocal or multiple reference. Drawing on the revisionist trend in recent historiography, the book offers new and thought-provoking readings of familiar texts. Dryden's *Aeneid* version and Pope's *Rape of The Lock* are shown to belong not just to contemporary convention, but to a more widespread and older style of envisioning high politics and the crises of government. The early books of *The Prelude* can be seen to show marked political features; reflections of the 1688 Revolution are

traced in *The Rape of the Lock*; and a Jacobite emotion is identified in *The Vanity of Human Wishes*. Taking issue with recent New Historicist Romantic criticism, the concluding chapters argue that what have seemed to many to be traces of covert political displacement or erasure in Wordsworth are in fact marks of a continuing political preoccupation, which found new forms after the collapse of the Enlightenment programme into the Jacobin terror.

Mystic Createspace Independent Pub

A Handbook exploring how the events of the English Revolution grew out of, and resonated, in the politics and interactions of the each of the Three Kingdoms - England, Scotland, and Ireland - and demonstrating the long-term impacts of the crisis on the kingdoms themselves, as well as in a broader European context.

The Atterbury Plot Springer

Globalization is not new, nor is it a policy, it's a process that has existed as long as man looked over the horizon, travelled and traded. It can't be stopped but it can be slowed. It came to a grinding halt in August 1914 and the Marxist detour cost millions of lives and lost three generations their opportunity and hope in many countries. More wealth has been created in the past 60 years than in all of history. After the most successful decade of sustained economic growth in history, this progress is threatened. Extreme inequality, corruption and environmental degradation threaten the stability and legitimacy of many developing countries' regimes. Anti-globalization and anti-capitalist campaigners' confidence has been emboldened due to the present economic crisis. Protectionist rhetoric is growing as are the arguments to control and regulate markets. Leaders are meeting to discuss how to face these problems and create a new international architecture. How did we get to this position? What should we do? What is it that determines why some contemporary states are successful while others have failed? *Saving Globalization* departs from its analysis of the globalised economy in the twenty-first century to answer these questions by tracing the development of what Moore considers to be 'the big ideas of history': democracy, independent courts, the separation of church and state, property rights, independent courts, a professional civil service, and civil society. Democratic capitalism has worked for most people. Why? It is a remarkable story, from the Greeks to the Geeks, encompassing technological progress and the corrections and contradictions between liberty and equality, technology, growth and the environment. In defence of the many virtues

and opportunities that globalisation offers, Mike Moore makes the case for a fresh and new approach to our international institutions and for domestic policies that promote equity and fairness. The book controversially attacks the new enemies of reason and evidence. The threats now come from all sides, especially workers in developed countries who fear for their jobs. Mike Moore is a political practitioner turned theoretician.

A Student's A-Z of Psychology Springer Science & Business Media

Students have different learning styles! Understanding Learning Styles helps teachers determine the learning style of each student and the appropriate delivery methods to target and address the needs of as many of the intelligences as possible. Different learning-styles are presented in this professional book that helps teachers determine how best to teach their students. Surveys, practical ideas, and suggestions for designing lessons that incorporate multiple learning styles are provided to show teachers how to differentiate instruction. This resource is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills. 208pp.

When the King Took Flight Princeton University Press

We live in an era when the unprecedented speed of change means: The only certainty is uncertainty; you can't predict what skills will be useful in ten years time; in most professions knowledge is doubling every two or three years; and no job is forever--so being employable means being flexible and retraining regularly. Accelerated Learning into the 21st Century contains a simple but proven plan that delivers the one key skill that every working person, every parent and student must master, and every teacher should teach: it's learning how to learn. The theory of eight multiple intelligences (linguistic, logical-mathematical, visual-spatial, kinesthetic, musical, interpersonal, intrapersonal, and naturalist) developed by Howard Gardner at Harvard University provides a foundation for the six-step MASTER-Mind system to facilitate learning (an acronym for Mind, Acquire, Search, Trigger, Exhibit, and Review), and is enhanced by the latest findings on the value of emotion and memory on the process of learning. Combined with motivational stories of success applying these principles, and putting forth a clear vision of how the United States can dramatically improve the education system to remain competitive in the next century, Accelerated Learning into the 21st Century is a dynamic tool for self-improvement by individuals as diverse as schoolchildren and corporate executives.

Education and Technology Simon and Schuster

A sweeping novel about the extraordinary woman who captured Napoleon's heart, created a dynasty, and changed the course of history—from the New York Times bestselling author of *The Traitor's Wife*, *The Accidental Empress*, and *Sisi* "I absolutely loved *The Queen's Fortune*, the fascinating, little-known story of Desiree Clary—the woman Napoleon left for Josephine—who ultimately triumphed and became queen of Sweden."—Martha Hall Kelly, New York Times bestselling author of *Lilac Girls* As the French revolution ravages the country, Desiree Clary is faced with the life-altering truth that the world she has known and loved is gone and it's fallen on her to save her family from the guillotine. A chance encounter with Napoleon Bonaparte, the ambitious and charismatic young military prodigy, provides her answer. When her beloved sister Julie marries his brother Joseph, Desiree and Napoleon's futures become irrevocably linked. Quickly entering into their own passionate, dizzying courtship that leads to a secret engagement, they vow to meet in the

capital once his career has been secured. But her newly laid plans with Napoleon turn to sudden heartbreak, thanks to the rising star of Parisian society, Josephine de Beauharnais. Once again, Desiree's life is turned on its head. Swept to the glittering halls of the French capital, Desiree is plunged into the inner circle of the new ruling class, becoming further entangled with Napoleon, his family, and the new Empress. But her fortunes shift once again when she meets Napoleon's confidant and star general, the indomitable Jean-Baptiste Bernadotte. As the two men in Desiree's life become political rivals and military foes, the question that arises is: must she choose between the love of her new husband and the love of her nation and its Emperor? From the lavish estates of the French Riviera to the raucous streets of Paris and Stockholm, Desiree finds herself at the epicenter of the rise and fall of an empire, navigating a constellation of political giants and dangerous, shifting alliances. Emerging from an impressionable girl into a fierce young woman, she discovers that to survive in this world she must learn to rely upon her instincts and her heart. Allison Pataki's meticulously researched and brilliantly imagined novel sweeps readers into the unbelievable life of a woman almost lost to history—a woman who, despite the swells of a stunning life and a tumultuous time, not only adapts and survives but, ultimately, reigns at the helm of a dynasty that outlasts an empire.

Amusing Ourselves to Death Turtleback

"A detailed report on how to achieve the learning revolution that is urgently required to match the revolution in formation and technology. A working guide for everyone, with special interest to teachers at all grade and college levels."--Page 10.

How to Give Your Baby Encyclopedic Knowledge A&C Black

Time and again, the work performed at The Institutes for the Achievement of Human Potential has demonstrated that children from birth to age six are capable of learning better and faster than older children. *How To Teach Your Baby To Read* shows just how easy it is to teach a young child to read, while *How To Teach Your Baby Math* presents the simple steps for teaching mathematics through the development of thinking and reasoning skills. Both books explain how to begin and expand each program, how to make and organize necessary materials, and how to more fully develop your child's reading and math potential. *How to Give Your Baby Encyclopedic Knowledge* shows how simple it is to develop a program that cultivates a young child's awareness and understanding of the arts, science, and nature—to recognize the insects in the garden, to learn about the countries of the world, to discover the beauty of a Van Gogh painting, and much more. *How To Multiply Your Baby's Intelligence* provides a comprehensive program for teaching your young child how to read, to understand mathematics, and to literally multiply his or her overall learning potential in preparation for a lifetime of success. The Gentle Revolution Series: The Institutes for the Achievement of Human Potential has been successfully serving children and teaching parents for five decades. Its goal has been to significantly improve the intellectual, physical, and social development of all children. The groundbreaking methods and techniques of The Institutes have set the standards in early childhood education. As a result, the books written by Glenn Doman, founder of this organization, have become the all-time best-selling parenting series in the United States and the world.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." -Jonathan Yardley, *The Washington Post Book World*

Accelerated Learning for the 21st Century Oxford Handbooks

What does the future hold for digital technology and education? What can be learnt from the history of technology use in education? Does digital technology make education more individualized? Will it eventually replace the school, university and teacher? In a thoroughly revised edition of this successful book, Neil Selwyn takes a critical look at some of the major current debates and controversies concerning digital technologies and education. Focusing on the social as well as the technical aspects of these issues, Selwyn addresses fundamental but often unvoiced questions about education and technology. Over the course of eight chapters, the book gives careful thought to the people, practices, processes and structures behind the rapidly increasing use of technologies in education, with an emphasis on the implications of digital technologies for individuals and institutions. Brand new chapters on trends in AI and 'big data' driven automation of education, and the future(s) of education and technology are included. This edition also features new sections exploring 'post-digital' perspectives, personalized learning, digital labour, and the impending need for sustainable forms of digital education. The book focuses attention on the connections between recent technology developments and broader changes in education practice, education policy and education theory over the past few decades. It also challenges us to reflect on future directions and controversies for education in the (post)digital age. Expanded study questions, annotated further reading and a new glossary of key terms are included to support readers. An updated companion website links to bonus chapters and audio recordings for further discussion.

The Learning Revolution Penguin Group

"Alex Dryden is a writer who can please everyone from fans of old le Carré to students of current affairs." —James Grippando, New York Times bestselling author of *Afraid of the Dark* "Ex-KGB Colonel Anna Resnikov is a terrific heroine." —Phillip Margolin, New York Times bestselling author of *Supreme Justice* "Alex Dryden is the real thing. If he got any realer, he would step out of the pages

and physically punch you, with both elegance and regret." —Hugh Laurie, star of "House" An author whom the Richmond Times Dispatch calls, "the next John le Carré," Alex Dryden returns with *The Blind Spy*—the third book in his critically acclaimed espionage fiction series featuring Anna Resnikov, formerly of the KGB in Moscow. One of the most intriguing female protagonists in contemporary fiction, Anna is back in the rifle sights of her former masters as she races to expose Russia's plot to destabilize the Ukraine and retake their former territory. A story almost literally ripped from the headlines, *The Blind Spy* is a gripping, smart adventure that crackles with authentic modern spycraft—an absolute must-read for fans of John le Carré, Alex Berenson, Martin Cruz Smith's Arkady Renko series, spy novel and geopolitical thriller devotees, and for any readers interested in what's really going on in the "new Russia."

[Born Under Saturn](#) New York Review of Books

This Handbook presents a comprehensive introduction and thirty-seven new analytical essays on the issues, contexts, and texts of the English Revolution. Offering textual, literary critical, historical, and methodological information, the volume exemplifies new and diverse approaches to revolutionary writing and maps out future avenues of research.

The Cambridge Companion to John Dryden Square One Publishers, Inc.

All of us, together, are going through the most profound revolution in human history. Its impact is personal, national, global - and, in many ways, unlimited. This new networked age makes it urgent to rethink entirely what we mean by education, learning, teaching, and schooling. Now the world is your classroom and learning is lifelong. There are seven keys to unlock the new revolution in that it's personal, interactive, global, instant, mainly free, easily shared, and co-operative. Dutch born Canadian educationalist Jeannette Voss is a well known international keynote conference presenter with a "whole person approach" to learning. Gordon Dryden is well known in New Zealand from his time as a journalist and radio host and lately for his interest in the use of technology for the benefit of education. This book is a sequel to Voss and Dryden's 2003 bestseller *THE LEARNING REVOLUTION*.
