Task-based Language Teaching OECD
Publishing

This text is part of a new series of

original fiction, specially written for learners of English. Graded into six levels - from elementary to advanced - the stories provide easy and enjoyable reading on a wide range of contemporary topics and themes.

Last in First Out? Maklu

The Report is an annual report, which is presented for the first time this year. It currently comprises 25 national reports regarding each state and the tendencies of Islamophobia in each respective country.

Speech Production and Second Language Acquisition Apress

This volume provides the first comprehensive investigation of the Netherlands in the World Englishes paradigm. It explores the history of English contact, the present spread of English and attitudes towards English in the Netherlands. It describes the development and analysis of the Corpus of Dutch English, the first Expanding Circle corpus based on the design of the International Corpus of English. In addition, it investigates the applicability

of Schneider's (2003, 2007) Dynamic Model, concluding that this and other such models need to move away from a colonisation-driven approach and towards a globalisation-driven one to explain the continued spread and evolution of English today. The volume will be highly relevant to researchers interested in the status and use of English in the Netherlands. More broadly, it provides a timely contribution to the debate on the relevance of the World Englishes framework for non-native, non-postcolonial settings such as Continental Europe.

How to be Good Routledge

This open access book aims to set an agenda for research and action in the field of Digital Humanism through short essays written by selected thinkers from

a variety of disciplines, including computer science, philosophy, education, law, economics, history, anthropology, political science, and sociology. This initiative emerged from the Vienna Manifesto on Digital Humanism and the associated lecture series. Digital Humanism deals with the complex relationships between people and machines in digital times. It acknowledges the potential of information technology. At the same time, it points to societal threats such as privacy violations and ethical concerns around artificial intelligence, automation and loss of jobs, ongoing monopolization on the Web, and sovereignty. Digital Humanism aims to address these topics with a sense of urgency but with a constructive mindset. The book argues

for a Digital Humanism that analyses and, most importantly, influences the complex interplay of technology and humankind toward a better society and life while fully respecting universal human rights. It is a call to shaping technologies in accordance with human values and needs.

Tourism Development Manning Publications

This review report for the Netherlands provides, from an international perspective, an independent analysis of major issues facing the Dutch evaluation and assessment framework in education, current policy initiatives and possible future approaches.

Brinkman's catalogus van boeken en tijdschriften Amsterdam University Press
This is a collection of 11 analytical and

empirical studies on the process of second language acquisition, probing a wide array of issues, from transfer appropriate processing to L2 default processing strategies, among hearing or deaf learners of a variety of target languages.

In the Shadow of the Mountain Level 5 Upper Intermediate Book with Audio CDs (2) Pack SETA

Focuses for the first time on materials development and applications of current research and theory for the main areas of applied linguistics (e.g. second language acquisition, pragmatics, vocabulary studies). There are many books on applied linguistic theory and research and there are now a number of books on the principled development of materials for language learning, but this

book takes a new approach by connecting the two concerns. Each of its chapters first of all presents relevant theories and research conclusions for its area and then considers practical applications for materials development. The chapters achieve these applications by reporting and commenting on current theory and research, by analysing the match between current published materials and current theory and by suggesting and exemplifying applications of current theory to materials development. This will be an essential resource both for those studying or teaching materials development and for those studying or teaching applied linguistics.

Improving School Leadership The Toolkit
BRILL

This fifth volume of PISA 2012 results presents an assessment of student performance in problem solving, which measures students' capacity to respond to non-routine situations in order to achieve their potential as constructive and reflective citizens.

Boekblad Macmillan

This volume on Transfiction (understood as an aestheticized imagination of translatorial action) recognizes the power of fiction as a vital and pulsating academic resource, and in doing so helps expand the breadth and depth of TS. The book covers a selection of peer-reviewed papers from the 1st International Conference on Fictional Translators and Interpreters in Literature and Film (held at the University of Vienna, Austria in 2011) and links

literary and cinematic works of translation fiction to state-of-the-art translation theory and practice. It presents not just a mixed bag of cutting-edge views and perspectives, but great care has been taken to turn it into a well-rounded transfictionario with a fluid dialogue among its 22 chapters. Its investigation of translatorial action in the mirror of fiction (i.e. beyond the cognitive barrier of 'fact') and its multiple transdisciplinary trajectories make for thought-provoking readings in TS, comparative literature, as well as foreign language and literature courses. The five-volume set LNCS 8004--8008 constitutes the refereed proceedings of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, NV, USA in July 2013. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major

advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers in the thematic area of human-computer Interaction, addressing the following major topics: HCI in healthcare; games and gamification; HCI in learning and education; in-vehicle Interaction.

Brinkman's cumulatieve catalogus van boeken CABI

A collection of essays from scholars evaluating tourism as a means of stimulating economic growth and fighting economic inequalities in poor countries. It takes a look at the successes and failures of tourism in this role, and considers why tourism as a catalyst for economic development can be a controversial device.

Design Research in Statistics

Education on Symbolizing and Computer Tools Springer

The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET)

band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers that provide new analytic and empirical material on:

- The political economy of TVET types in different countries which, by comparison, illuminate the South African case;
- A periodisation of government interventions in the TVET sector over the last three decades;
- The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service;
- The halting evolution of collegial relationships between college lecturers towards higher collegiality;
-

Employer expectations of college graduates and how colleges are responding; and • An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape. This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

Soldier Dog Anchor Canada

G is for Genes shows how a dialogue between geneticists and educationalists can have beneficial results for the education of all children—and can also benefit schools, teachers, and society at large. Draws on behavioral genetic research from around the world,

including the UK-based Twins' Early Development Study (TEDS), one of the largest twin studies in the world Offers a unique viewpoint by bringing together genetics and education, disciplines with a historically difficult relationship Shows that genetic influence is not the same as genetic determinism and that the environment matters at least as much as genes Designed to spark a public debate about what naturally-occurring individual differences mean for education and equality

Understanding Second Language

Process Springer Nature

Follows the World War I experiences of Stanley, who upon joining the war effort to escape his father is assigned to the experimental War Dog School, where he trains a Great Dane with whom he

attempts to find his missing soldier brother.

API Security in Action teaches you how to create secure APIs for any situation. By following this hands-on guide you'll build a social network API while mastering techniques for flexible multi-user security, cloud key management, and lightweight cryptography. Summary A web API is an efficient way to communicate with an application or service. However, this convenience opens your systems to new security risks. API Security in Action gives you the skills to build strong, safe APIs you can confidently expose to the world. Inside, you'll learn to construct secure and scalable REST APIs, deliver machine-to-

machine interaction in a microservices architecture, and provide protection in resource-constrained IoT (Internet of Things) environments. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the technology APIs control data sharing in every service, server, data store, and web client. Modern data-centric designs—including microservices and cloud-native applications—demand a comprehensive, multi-layered approach to security for both private and public-facing APIs. About the book API Security in Action teaches you how to create secure APIs for any situation. By following this hands-on guide you'll build a social network API while mastering techniques for flexible multi-user security, cloud key

management, and lightweight cryptography. When you're done, you'll be able to create APIs that stand up to complex threat models and hostile environments. What's inside

Applied Linguistics and Materials Development Springer
 The Complete Business Process Handbook is the most comprehensive body of knowledge on business processes with revealing new research. Written as a practical guide for Executives, Practitioners, Managers and Students by the authorities that have

shaped the way we think and work with process today. It stands out as a masterpiece, being part of the BPM bachelor and master degree curriculum at universities around the world, with revealing academic research and insight from the leaders in the market. This book provides everything you need to know about the processes and frameworks, methods, and approaches to implement BPM. Through real-world examples, best practices, LEADing practices and advice from experts, readers will understand how BPM works and how to best use it to their advantage. Cases from industry leaders and innovators show how early adopters of LEADing Practices improved their businesses by using BPM technology and methodology. As the first of three

volumes, this book represents the most comprehensive body of knowledge published on business process. Following closely behind, the second volume uniquely bridges theory with how BPM is applied today with the most extensive information on extended BPM. The third volume will explore award winning real-life examples of leading business process practices and how it can be replaced to your advantage. Learn what Business Process is and how to get started Comprehensive historical process evolution In-depth look at the Process Anatomy, Semantics and Ontology Find out how to link Strategy to Operation with value driven BPM Uncover how to establish a way of Thinking, Working, Modelling and Implementation Explore comprehensive

Workshop on Task Models and Diagrams
 for User Interface Design, TAMODIA
 2009, held in Brussels, Belgium, in
 September 2009. The 12 revised full
 papers presented were carefully
 reviewed and selected from numerous
 submissions for inclusion in the book.
 The workshop features current research
 and gives some indication of the new
 directions in which task analysis
 theories, methods, techniques and tools
 are progressing. The papers are
 organized in topical sections on business
 process, design process, model driven
 approach, task modeling, and task
 models and UML.
Conceptualizing Environmental
Citizenship for 21st Century Education
 Cambridge University Press
 Writing love letters, making phone calls,

and sending gifts, these are all seemingly innocuous behaviours. This changes when the love expressed in the letters remains unrequited, when the phone calls amount to hundreds a night, or when the gifts consist of bullets and funeral wreaths. When attempts to contact another person happen with a certain nature and frequency, the behaviour can be qualified as stalking and it can have a detrimental impact on the life of the person subjected to the unwanted attention. In this book an account is given of the nature and prevalence of the problem of stalking in the Netherlands, of the effectiveness and the (dis)advantages of resorting to the police, and of the pros and cons of two alternative anti-stalking measures: hiring the services of a private

investigation and protection agency and obtaining a civil restraining order.

Stalking in the Netherlands

Multilingual Matters

Over the past two decades, task-based language teaching (TBLT) has gained considerable momentum in the field of language education. This volume presents a collection of 20 reprinted articles and chapters representative of work that appeared during that period. It introduces readers- - graduate students, researchers, teachers - -to foundational ideas and themes that have marked the emergence of TBLT. The editors provide a first chapter that locates TBLT within broader discourses of educational practice and research on language learning and teaching. The book then features four sections consisting of

important, often difficult to find, writings on major themes: fundamental ideas, approaches, and definitions in TBLT; curriculum, syllabus, and task design; variables affecting task-based language learning and performance; and task-based assessment. In a concluding

chapter, the editors challenge simplistic notions of TBLT by reflecting on how this body of work has initiated the possibility of a truly researched language pedagogy, and they highlight critical directions in TBLT research and practice for the future.
