Some fifty thousand Soviets visited the United States under various exchange programs between 1958 and 1988. They came as scholars and students, scientists and engineers, writers and journalists, government and party officials, musicians, dancers, and athletes—and among them were more than a few KGB officers. They came, they saw, they were conquered, and the Soviet Union would never again be the same. Cultural Exchange and the Cold War describes how these exchange programs (which brought an even larger number of Americans to the Soviet Union) raised the Iron Curtain and fostered changes that prepared the way for Gorbachev's glasnost, perestroika, and the end of the Cold War. This study is based upon interviews with Russian and American participants as well as the personal experiences of the author and others who were involved in or administered such exchanges. Cultural Exchange and the Cold War

demonstrates that the best policy to pursue with countries we disagree with is not isolation but engagement.

While the Internet is an important source for locating photographic images, there still are hundreds of photography books published each year for whose contents there is no external access. This second supplement to Photography Books Index addresses this need by analyzing important photographic anthologies that were published since 1985. Accessing more than fifty photographic anthologies that are widely held in libraries across the country--along with images from two critical annual compilations, Best of Photojournalism and Graphis Annual--this book identifies photographs that record the history of our times. With nearly twice the number of works indexed in the first supplement, Photography Books Index III: A Subject Guide to Photo Anthologies cites a wider scope of publications. This reference guide provides an important index to contemporary as well as historical photographers, including those for whom full monographs have not been published. Photographs of important individuals as well as photographic records of cataclysmic events such as war, genocide, and mass starvation also

can be located through this index. Extensive descriptions of the individual photographs--from the commonplace to the extraordinary--are identified in this volume. Organized into three sections-- Photographers, Subjects of Photographs, and Portraits of Named Individuals-- these descriptions provide the researcher with important information on each photograph. An essential volume for all public, special and academic libraries, this index will be an invaluable resource for reporters, historians, academics, students and anyone wishing to research photographs and photographers.
