The Business of  
Healthcare Innovation

Springer Nature  
Culture, Leadership, and  
Organizations reports the  
results of a ten-year

research program, the Global Leadership and Organizational Behavior Effectiveness (GLOBE) research program. GLOBE is a long-term program designed to conceptualize, operationalize, test, and validate a cross-level integrated theory of the relationship between culture and societal, organizational, and leadership effectiveness. A team of 160 scholars worked together since 1994 to study societal culture, organizational culture, and attributes of

effective leadership in 62 cultures. Culture, Leadership, and Organizations: The GLOBE Study of 62 Societies reports the findings of the first two phases of GLOBE. The book is primarily based on the results of the survey of over 17,000 middle managers in three industries: banking, food processing, and telecommunications, as well as archival measures of country economic prosperity and the physical and psychological well-being of the cultures studied.

The Business of Healthcare Innovation is the first wide-ranging analysis of business trends in the manufacturing segment of the health care industry. In this leading edge volume, Professor Burns focuses on the key role of the 'producers' as the main source of innovation in health systems. Written by professors of the Wharton School and industry executives, this book provides a detailed overview of the

pharmaceutical, biotechnology, genomics/proteomics, medical device and information technology sectors. It analyses the market structures of these sectors as well as the business models and corporate strategies of firms operating within them. Most importantly, the book describes the growing convergence between these sectors and the need for executives in one sector to increasingly draw upon trends in the others. It will be essential reading for

students and researchers in the field of health management, and of great interest to strategy scholars, industry practitioners and management consultants. Shedding light on consumer experiences, this study explores the socio-cultural landscape of Japan, the nation that boasted the second largest economy in the late twentieth century.

Drawing its analysis from various media sources, popular literary works, and public reports, the book articulates how the late 1980s calibrated consumer demands, lifestyles, and perceptions of wealth. Through an examination of the qualitative effects of 'Bubble money' on consumers, the book disentangles the anatomy of the festive ambience in the economic phase, closely reading fictional and non-fictional literary works that play the role of reportage, critique, and

satire. Through observations of human behaviours in consumption, the book reveals psychosomatic experiences and self-consciousness. Featuring a wide range of sources from Japanese media and literary works which have yet to be translated for an English audience, this book will be a valuable resource for students and scholars of modern Japanese culture and literature who are interested in the socio-economic landscape of late-twentieth-century

Japan.

*Business Ethics, Seventh Edition* Routledge

The seventh edition of this pragmatic guide to determining right and wrong in the workplace is updated with new case studies, exercises, and ancillary materials. Joseph Weiss's *Business Ethics* is a pragmatic, hands-on guide for determining right and wrong in the business world. To be socially responsible and ethical, Weiss maintains, businesses must acknowledge the impact their decisions can have

on the world beyond their walls. An advantage of the book is the integration of a stakeholder perspective with an issues and crisis management approach so students can look at how a business's actions affect not just share price and profit but the well-being of employees, customers, suppliers, the local community, the larger society, other nations, and the environment. Weiss includes twenty-three cases that immerse students directly in contemporary ethical dilemmas. Eight new

cases in this edition include Facebook's (mis)use of customer data, the impact of COVID-19 on higher education, the opioid epidemic, the rise of Uber, the rapid growth of AI, safety concerns over the Boeing 737, the Wells Fargo false saving accounts scandal, and plastics being dumped into the ocean. Several chapters feature a unique point/counterpoint exercise that challenges students to argue both sides of a heated ethical issue. This edition has

eleven new point/counterpoint exercises, addressing questions like, Should tech giants be broken apart? What is the line between free speech and dangerous disinformation? Has the Me Too movement gone too far? As with previous editions, the seventh edition features a complete set of ancillary materials for instructors: teaching guides, test banks, and PowerPoint presentations. *Navigating Precarity in Educational Contexts*

 The negotiation of the Canada-United States U.S. Free Trade Agreement in 1985-88 initiated a period of substantially increased North American, and later, global, economic integration. However, events since the election of Donald Trump in 2016 have created the potential for major policy shifts arising from NAFTA's renegotiation and from continuing political

uncertainties in the United States and with Canada's other major trading partners. Navigating a Changing World draws together scholars from both countries to examine Canada-U.S. policy relations, the evolution of various processes for regulating market and human movements across national borders, and the specific application of these dynamics to a cross-section of policy fields with significant implications for Canadian public policy. This book explores the interaction

impact of territorial institutions and extra-territorial forces – institutional, economic, and technological, among others – on interactions across national borders, both within North America and, where relevant, in broader economic relationships affecting the movement of goods, services, people, and capital. Above all, Navigating a Changing World represents the first major study to address Canada's international policy relations within and beyond North America

since the elections of Justin Trudeau in 2015 and Donald Trump in 2016 and the renegotiation of NAFTA. [CultureShock! Japan](#) Lulu.com

This book brings together distinguished scholars, community college practitioners, and emerging leaders to

expand upon existing theories, provide reflection on practice, and demonstrate the dynamic nature of community college internationalization. There is a special challenge for United States community colleges to move from selected international programs that impact a few students to sustainable change that influences the entire college community. A key importance is realization that reform is not based on chance, but on intentional designs that

are intended to guide future endeavors. The research, case studies, and experiences of the authors in this book are both inspiring and critical in the quest to encourage an academic shift for long-term change that promotes international literacy as an integral component of the community college and celebrates the needs of the changing local communities.

As the world globalises, more people than ever

are on the move, including the many professional, managerial and entrepreneurial elites—often referred to as ‘international talent’—who circulate between cities in response to career and business opportunities. While much has been written about the economic motivations behind these mobilities, less is known about the everyday experiences and encounters of highly skilled transnational migrants, who, with the rise of Asia as an

economic powerhouse and cultural magnet, are not only increasingly Asian in composition but also rapidly attracted to the globalising cities in Asia. The book demonstrates how the migratory moves of transnational elites are not only implicated in the reality of multiple belongings, but are also intertwined with the broader cultural politics of specific places. By exploring the interfaces of contact and their diverse subjectivities from race and gender to class and

nationality, this collection as a whole—with papers examining talent moving among cities in China, Taiwan, Singapore, Japan, Britain and Canada—paints a decidedly complex picture of how talented migrants inhabit the world in ‘more-than-rational’ ways. Through the lens of the everyday, this book uncovers the ways in which ‘cosmopolitanisms’ are forged in uneven and contested ways in different localities, as well as offer new insights into cities as transnational

spaces of encounter in the 21st century. This book was originally published as a special issue of the Journal of Ethnic and Migration Studies.
