*Burke's Texas Almanac* Hachette UK Named by BuzzFeed as one of Winter 2021's Most Anticipated Historical Fiction Books and Top 10 New Books To Add To Your Reading List! It's hot, Texas, and the year 1977. Jimmy Carter is in office. The Walters are a good, churchgoing family who stand for holiness, purity, grace, and Christian love. Except when they don't. Family patriarch and fanatic preacher, Victor Black, knows many things for sure, including the fact that abortion is murder and should be punishable by death--a position he defends live in a televised debate. Black's youngest granddaughter, Stephanie Walters, sits in the front row wearing her frilly Sunday dress, listening carefully to every word. But it doesn't take long for cracks to appear in the Walters upstanding family facade. Stephanie's mother, Lily, begins telling unsettling stories about having a baby who died, and her story keeps changing. It's clear Lily has a secret--one that righteous Victor Black would kill her for if he knew. This family secret burns more than the lies . . . From the Moon I

WatchedHer is a coming-of-age tale about the skeletons that lurk under church pews and the little girl who goes looking for and finds them. Amid the dark and quirky terrain of camp revivals, burning crosses, and public shunnings, one child from the Southern Churches of Christ cries out.

Quicklet on S. C. Gwynne's Empire of the Summer Moon (CliffsNotes-like Book Summary) Moon Travel

From an Edgar award-winning author comes the gripping and unexpected tale of a lost town and the dark secrets that lie beneath the glittering waters of an East Texas lake. Daniel Russell was only thirteen years old when his father tried to kill them both by driving their car into Moon Lake. Miraculously surviving the crash—and growing into adulthood—Daniel returns to the site of this traumatic incident in the hopes of recovering his father's car and bones. As he attempts to finally put to rest the memories that have plagued him for years, he discovers something even more shocking among the wreckage that has ties to a twisted web of dark deeds, old grudges, and strange murders. As Daniel diligently follows where the mysterious trail of vengeance leads, he unveils the heroic revelation at its core. From the Moon I Watched Her Hachette

I Have A Poem The Size Of The Moon is a book of poems about Nebraska. Not cornfields, not cows: Cities, highways, long drives and the political conversations simmering. Between Meteors and Fireflies In a drought year, corn stubble bends into Headlines: "Farmers pray for rain." Tumbleweeds

take time to harmonize and choreograph, somewhere between meteors and fireflies. The grocery sells blueberries all year round, but the charge card feels heavy as a refrigerator once you slip it from the wallet. You don't end up buying the magazines, just browse. It's a tow truck, doorbell button, garbage disposal broke summer: no real difference between a silo and a paper sack, it seems. And in the hallway, light glows from under the bathroom door.

*Beneath a Texas Moon* Simon and Schuster

From the Edgar Award-winning author of the Hap and Leonard series, a hard-boiled novel set in 1960s Texas in which a no-nonsense car salesman faces a tempting decision, a dangerous deal, and an alluring affair. Ed Edwards is in the used car business, a business built on adjusted odometers, extra-fine print, and the belief that "buyers better beware." Burdened by an aging, alcoholic mother constantly on his case to do something worthier of his lighter skin tone and dreaming of a brighter future for himself and his plucky little sister, Ed is ready to get out of the game. When Dave, his lazy, grease-stained boss at the eponymous dealership Smiling Dave's sends him to repossess a Cadillac, Ed finally gets the chance to escape his miserable life. The Cadillac in question was purchased by Frank Craig and his beautiful wife Nancy, owners of a local drive-in and pet cemetery. Fed up with her deadbeat husband and with unfulfilled desires of her own, Nancy suggests to Ed -- in the throes of their salacious affair -- that they kill Frank and claim his insurance policy. It is a tantalizing offer: the girl, the car, and not one, but two businesses. Ed could finally say goodbye to Smiling Dave's, and maybe even send his sister

to college. But does he have what it takes to see the plan through? Told with Joe Lansdale's trademark grit, wit, and dark humor, *More Better Deals* is a gripping tale of the strange characters and odd dealings that define 1960s East Texas.

Fodor's Texas Moon Travel

On July 20, 1969, humanity paused with attention locked to television and radio broadcasts as the astronauts of the Apollo 11 mission dramatically touched down on the dusty face of the moon. The first word from the lunar surface: Houston. Houston, Space City USA is a visual celebration of the city's historic ties to the US human space program. When President Kennedy declared, "We choose to go to the moon in this decade and do the other things, not because they are easy, but because they are hard," he did so from the campus of Rice University. More than half a century later, Houston continues to serve as the nerve center of the American human space program. Author and photographer Ray Viator, a longtime Houstonian, has lovingly captured the spirit of a city's devotion to space exploration from then to now. Using striking photographs of the full moon as a visual motif of Houston's connection to spaceflight, Viator also weaves together historic images to show how former cow pastures transformed into mission control. Some connections are obvious—the Houston Astros or the Houston Rockets. Others are hidden in

plain sight, like the arm patches on the uniform of every Houston police officer that read, "Space City U.S.A." Viator's lens captures this and more. Houston, Space City USA not only marks the important milestone of the first lunar landing, but it also helps readers discover and rediscover a city's constellation of connections to one of humankind's greatest achievements. The author's proceeds from the sale of this book will benefit Houston Public Media.

On the eve of its centennial, Carol Dawson and Roger Allen Polson present almost 100 years of history and never-before-seen photographs that track the development of the Texas Highway Department. An agency originally created "to get the farmer out of the mud," it has gone on to build the vast network of roads that now connects every corner of the state. When the Texas Highway Department (now called the Texas Department of Transportation or TxDOT) was created in 1917, there were only about 200,000 cars in Texas traveling on fewer than a thousand miles of paved roads. Today, after 100 years of the Texas Highway Department, the state boasts over 80,000 miles of paved, state-maintained roads that accommodate more than 25 million vehicles. Sure to interest history enthusiasts and casual readers alike, decades of progress and turmoil, development and disaster, and politics and corruption come together once more in these pages, which tell the remarkable story of an infrastructure 100 years in the making.

\*Finalist for the Pulitzer Prize and the National Book Critics Circle Award\* \*A New York Times Notable Book\* \*Winner of the Texas Book Award and the Oklahoma Book Award\* This New York Times bestseller and stunning historical account of the forty-year battle between Comanche Indians and white settlers for control of the American West "is nothing short of a revelation...will leave dust and blood on your jeans" (The New York Times Book Review). *Empire of the Summer Moon* spans two astonishing stories. The first traces the rise and fall of the Comanches, the most powerful Indian tribe in American history. The second entails one of the most remarkable narratives ever to come out of the Old West: the epic saga of the pioneer woman Cynthia Ann Parker and her mixed-blood son Quanah, who became the last and greatest chief of the Comanches. Although readers may be more familiar with the tribal names Apache and Sioux, it was in fact the legendary fighting ability of the Comanches that determined when the American West opened up. Comanche boys became adept bareback riders by

age six; full Comanche braves were considered the best horsemen who ever rode. They were so masterful at war and so skillful with their arrows and lances that they stopped the northern drive of colonial Spain from Mexico and halted the French expansion westward from Louisiana. White settlers arriving in Texas from the eastern United States were surprised to find the frontier being rolled backward by Comanches incensed by the invasion of their tribal lands. The war with the Comanches lasted four decades, in effect holding up the development of the new American nation. Gwynne's exhilarating account delivers a sweeping narrative that encompasses Spanish colonialism, the Civil War, the destruction of the buffalo herds, and the arrival of the railroads, and the amazing story of Cynthia Ann Parker and her son Quanah—a historical feast for anyone interested in how the United States came into being. Hailed by critics, S. C. Gwynne's account of these events is meticulously researched, intellectually provocative, and, above all, thrillingly told. *Empire of the Summer Moon* announces him as a major new writer of American history.
