## CAREY HARVEY

---

*Standard of Excellence* Alfred Music  
This book introduces music education majors to basic instrumental pedagogy for the instruments and ensembles most commonly found in the elementary and secondary curricula. This text focuses on the core competencies required for teacher certification in instrumental music. The first section of the book focuses on essential issues for a successful instrumental program: objectives, assessment and evaluation, motivation, administrative tasks, and recruiting and scheduling (including block scheduling).

The second section devotes a chapter to each wind instrument plus percussion and strings, and includes troubleshooting checklists for each instrument. The third section focuses on rehearsal techniques from the first day through high school. Woodwind Basics Focus

There are many books written for the Piano, Violin, etc., entirely devoted to Technic. This Work is especially written to enable the Student, by practice and application, to overcome any obstacle which may occur in musical passages written for the Cornet. By controlling the Wind Power to play these Exercises as written, in one breath, the Student will acquire ENDURANCE without strain or injury. Train the Muscles which control the Lips, to make them elastic and strong, as

only a slight pressure is necessary, and not brute force. The highest as well as the lowest notes can be played with equal tone quality if practiced according to the instructions that precede each Study. Every Cornet Player should have reached a degree of excellence before attempting to play these Exercises. To become an Expert on the Cornet, one should be familiar with as many Cornet Methods as possible, and so gain the experience of each. Every Exercise in this Book is possible, and not so very difficult if practiced slowly at first, and not too long at a time. I have used them for my daily practice for years, and they have been the means of my reaching the highest notes after playing a two-hour Concert, also of preserving my lips so that they never tire, and what has been a help

to me is surely good for other Cornet Players. You cannot expect to attain the highest point of excellence without hard work and perseverance. Never be perfectly satisfied with yourself. Try to make some improvement each day, feeling that it is a pleasure to have conquered that which seemed an impossibility at first. Do not neglect to correct immediately the least fault you make. Bad habits are easily formed, but are difficult to remedy. There are few Celebrated Cornet Soloists, although thousands play the instrument. Most players abuse their practicing by not knowing the proper way, and neglecting to pay more attention to the elementary work. These Studies have been found to be excellent for Clarinet Players as well as Cornet Players. The Clarinet being a Wind Instrument also, all these Exercises will appeal to the Player of that Instrument by following the same instructions.

Preparatory Melodies to Solo Work for B-Flat Cornet Alfred Music

First to be published in the series was The Art of French Horn Playing by Philip Farkas, now Distinguished Professor Emeritus of Music at Indiana University. In

1956, when Summy-Birchard published Farkas's book, he was a solo horn player for the Chicago Symphony and had held similar positions with other orchestras, including the Boston Symphony, Cleveland Orchestra, and Kansas City Conservatory, DePaul University, Northwestern University, and Roosevelt University in Chicago. The Art of French Horn Playing set the pattern, and other books in the series soon followed, offering help to students in learning to master their instruments and achieve their goals.

*Embouchure Building for French Horn* T. Bingham

This book has been designed as a supplementary study to be used along with any standard instruction book. The studies contained herein are excellent for use in the warm-up period prior to each daily session of practice. The technicality of the fingerings is comparatively simple and the studies can be used to advantage by a young student with only a few weeks of formal study. This book contains much valuable material essential to successful performance not found within standard instructional material.

*Daily Exercises for French Horn* Hal

Leonard Publishing Corporation  
Resource guide for professional woodwind and brass players suffering from performance related injuries.

**The Art of Trombone Playing** Alfred Music

"A "must" guide for the brass student and teacher relating to the total physical output that goes into playing any brass instrument. The same technique athletes use to develop their physical control as applied to musicians"--Back cover  
*Brass Playing is No Harder Than Deep Breathing* Alfred Music

This book has been designed as a supplementary study to be used along with any standard method book. The studies contained herein are excellent for use in the warm-up period prior to each daily practice or performance session. The technicality of the fingerings is comparatively simple and the studies can be used to advantage by the young student with only a few weeks of formal study. This book contains much valuable material essential to successful performance not found within standard instructional material.

*The Breathing Gym* Alfred Music

This book is a result of Eli Epstein's 18 years in the Cleveland Orchestra and 30 years of Conservatoire teaching. It breaks down into four parts, dealing with Technique, Musicianship, Warm up and Exercises and finally Applying the Method. It is both innovative and inspiring and presents his theories in a clear and understandable way, which gives the reader much to think about and practical ideas to help improve one's playing. An excellent addition to any horn enthusiast's collection. The third edition presents MRI images and data of an elite group of horn players, including Stefan Dohr, Fergus McWilliam, Sarah Willis, Stefan Jezierski (all of the Berlin Philharmonic), Marie-Luise Neunecker, Jeff Nelsen, and others. MRI films confirm that what we do internally, inside the mouth, pharynx, and thoracic cavity is just as important as what we do externally. And, just as there are hallmarks of healthy embouchures that most professional horn players employ, there are many consistent internal movement patterns among the elite group. Epstein presents tried and true methods to learn and teach these exemplary biomechanics. "Without a

doubt the most physiologically correct book ever published on horn playing."

~John Ericson, Horn Matters

40 Characteristic Etudes for French Horn  
Alfred Music

With a career spanning seven decades with the Indianapolis, Pittsburgh and Chicago Symphonies, Arnold Jacobs has earned a reputation as a world-class performer. Equally significant are his teachings. During his career, thousands of students have passed through his studio. Finally, there is the definitive book on his career. Arnold Jacobs: Song and Wind is written by Mr. Jacobs' assistant, Brian Frederiksen, and edited by John Taylor. With a length of 296 pages, material comes from masterclasses, private interviews, previously published writings and contributions from his students and colleagues. Subjects include: The Performer: Early Years, Curtis Institute, Indianapolis Symphony, Pittsburgh Symphony, Chicago Symphony, Conductors, Other Performances, York Tuba The Teacher: Physical Elements, Mental Elements, Performance, Instruments, The Jacobs Studio Discography, Full Documentation

And more . . .

Manual for Buglers, U.S. Navy Questions  
Ink. Publishing

This book is the largest and most complete book ever written about trumpet playing. 503 pages. Hardbound; cloth; 8.5 x 11 x 1.75 in.; 369 photos; 89 illustrations; dozens of music examples. David Hickman is considered one of the world's finest trumpet pedagogues with 35 years of university teaching. A must for all serious players and teachers!

Horn Playing from the Inside Out, Third Edition See Sharp Press

'Trumpet Technique' is a resource for performers, teachers, and students seeking to develop the highest level of skill. The author, a trumpet professor and performer, applies the latest developments in physiology, psychology, learning theory and psychomotor research to brass technique and performance.

**Flexus** Neil a Kjos Music Company  
This First Book of Practical Studies for French Horn is designed to develop chord consciousness and to provide additional experience in the fundamental rhythms, key signatures, and articulations and to improve accuracy in reading through the

use of interesting and melodic studies. It may be used either to supplement or to follow any beginning method book and will serve as an ideal preparation for the slightly more advanced techniques to be found in the Second Book.

### **Collected Thoughts on Teaching and Learning, Creativity, and Horn Performance**

Rubank Publications

Edward Kleinhammer, author of *The Art of Trombone Playing*, joined the Civic Orchestra, the training orchestra for the Chicago Symphony, in 1940. After two years he was accepted by the Chicago Symphony Orchestra, where he remained for his entire career until he retired in 1985. He has played under every Chicago Symphony Orchestra conductor, covering from Frederick Stock to Sir Georg Solti. In 1986 he received the Distinguished Service Award from the International Trombone Association. While Kleinhammer states that his book "is written for the student who has no teacher available or for the teacher seeking more fundamental knowledge of the field of trombone playing," he emphasizes that it is also "for the trombonist (in any stage of proficiency) who is always a student."

### **Musical Instrument Design**

Hal Leonard Publishing Corporation  
This book is an entirely new work rather than a revision of Lyndsay Langwill's sixth edition. It is the standard work in its field, the most comprehensive work on wind instrument makers in any language and a major reference tool for collectors and researchers. Some features of the New Langwill Index are: Entries for nearly 6500 makers and inventors, active from the beginning until the middle of the 20th century; Nearly 400 representations of maker's marks; An index of makers under workplace, listing over 1000 localities; A comprehensive bibliography of over 600 titles. - Publisher.

### Tradition of Excellence 1 (Trumpet)

London : Blackie and son (Southern Music). These etudes were composed by Henri Adrien Louis Kling to assist in the mastery of French Horn playing. Noted horn player, teacher and designer, Lorenzo Sansone has assembled this collection to help the developing French Horn player/student progress.

### **Thoughts on Playing the Horn Well**

Alfred Music  
Band Classroom Methods - All Levels

### *Practical Studies for French Horn, Bk 2* Alfred Music

Trombone Craft is a progressive method method targeted to high school or college trombone students. It can be useful for professionals as well. The first half of the book is in three main parts covering a variety of technical and rhythmic challenges. The second half of the book contains 8 appendices covering such topics as multiple tonguing, scales, high range development and tone/tuning.

### The Dale Clevenger French Horn Methods

Alfred Music Publishing

Woodwind Basics: Core concepts for playing and teaching flute, oboe, clarinet, bassoon, and saxophone is a fresh, no-nonsense approach to woodwind technique. It outlines the principles common to playing all of the woodwind instruments, and explains their application to each one. The ideas in this book are critical for woodwind players at all levels, and have been battle-tested in university woodwind methods courses, private studios, and school band halls.

Fundamental questions answered with newfound clarity include:- What should I listen for in good woodwind playing?- Why

is breath support so important, and how do I do and teach it?- What is voicing? How does it relate to ideas like air speed, air temperature, and vowel shapes?- What things does an embouchure need to accomplish?- How can I (or my students) play better in tune?- What role does the tongue really play in articulation?- Which alternate fingering should I choose in a given situation?- How do I select the best reeds, mouthpieces, and instruments?- How should a beginner choose which instrument is the best fit?Woodwind Basics

by Bret Pimentel is the new go-to reference for woodwind players and teachers.

Musical calisthenics for brass Alfred Music Publishing

This is an encyclopedic, large-format book containing hundreds of illustrations. While not geared toward making conventional instruments, Musical Instrument Design provides all the information that anyone (amateur or professional) should ever need to construct an amazingly wide variety of percussion, string, and wind

instruments. Includes many designs along with parts lists and detailed construction instructions.

*The Really Easy Horn Book* Oxford University Press
