Porter Walter de Gruyter Non-Destructive Testing, Volume 4 contains the proceedings of the Fourth European Conference held in London on September 13-17, 1987. Contributors

explore a variety of topics related to non-destructive testing (NDT), including ultrasonic techniques, ultrasonic systems, electromagnetic techniques, condition monitoring of plant and structures, and magnetic particle and penetrant techniques. This text is comprised of 98 chapters; the first of which describes an ultrasonic technique for the assessment of the fat content of live beef animals for breeding purposes. Attention then turns to measurements of

the longitudinal ultrasonic wave attenuation in spheroidal graphite iron test pieces subjected to fatigue loads. The chapters that follow focus on ultrasonic imaging; dry coupling probes; an expert system for ultrasonic examination of fuel rods; engineering and medical applications of diagnostic ultrasound; and signal processing of 3D maps of eddy currents. The reader is also methodically introduced to automation of eddy current testing; the use of artificial intelligence in

vibration-based health monitoring; automated inspection of magnetic particles; and the theory and practice of acoustic emission. This text concludes with a chapter that reviews the NDT research program of the National NDT Center of Harwell Laboratory in the UK. This book will be of interest to materials scientists, materials engineers, and metallurgists. [Report of the Work of the Public Archives ...](#) Elsevier The essays in Canadian Cultural Exchange /

Ã%changes culturels au Canada provide a nuanced view of Canadian transcultural experience. Rather than considering Canada as a bicultural dichotomy of colonizer/colonized, this book examines a field of many cultures and the creative interactions among them. This study discusses, from various perspectives, Canadian cultural space as being in process of continual translation of both the other and oneself. Les articles rÃ©unis dans Canadian Cultural

Exchange / Échanges culturels au Canada donnent de l'expérience transculturelle canadienne une image nuancée. Plutôt que dans les termes d'une dichotomie biculturelle entre colonisateur et colonisé, le Canada y est vu comme champ où plusieurs cultures interagissent de manière créative. Cette attitude présente sous de multiples aspects le processus continu de traduction d'autrui et de soi-même auquel l'espace culturel canadien
